Wyoming County Community Health System is excited to welcome Dr. Kevin O’Connell, board certified Ear, Nose and Throat specialist and head and neck surgeon, to our medical family. Dr. O’Connell is also board certified in Allergy, the first in our community.

What exactly is an ENT?
ENT physicians are trained in the medical and surgical treatment of the ear, nose, throat, as well as related structures of the head and neck. Some of the more common conditions include allergies, hearing loss, ear infections, and sinus problems.

This is great news for all Wyoming County residents, who can now get comprehensive, region-leading ear, nose and throat care without traveling far from home. For information or to make an appointment, call 587-786-1555 today. Most insurances accepted.

Appointments may be made by calling: 585-786-1555
